PRO SERIES CONNECT® WiFi2 MODULE

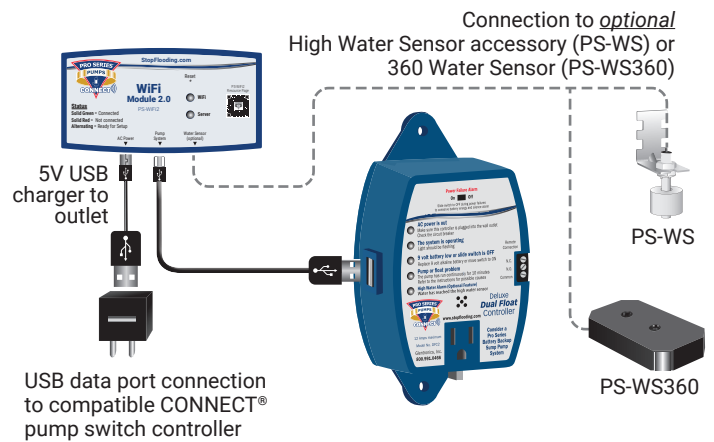

Installation Diagrams with the USB Data Port

Connection with the USB data port enables the homeowner to receive text, email or push notifications pinpointing a possible issue or informing the homeowner of needed maintenance.

USB data port connection to compatible Pro Series CONNECT® backup or combination system

USB data port connection to compatible Pro Series CONNECT® deluxe (DFC2 or VSC2) controller for pump

Included with PS-WiFi2 Module

- WiFi Module
- 5V 1A USB charger
- 2 USB-C cables
- Velcro
- Mounting hardware
- 1-year warranty from date of installation

Optional Accessories

- Use this sensor in a sump pit, sewage pit, or other area that can tolerate a $\frac{3}{8}$ " water depth
- If water lifts the float, the WiFi Module will send a text, email or push notification

- Use the 360° water sensor when you need to know if a minimal water buildup occurs
- If water reaches the sensor, the WiFi Module will send a text, email or push notification
